PATENT AND TRADEMARK OFFICE NOTICES

Patent Cooperation Treaty (PCT) Information

For information concerning PCT member countries, see the notice appearing in the *Official Gazette* at 1267 O.G. 34, on February 11, 2003.

Either the United States Patent and Trademark Office (USPTO) or the European Patent Office (EPO) may act as the International Searching Authority (ISA) for an international application filed with the United States Receiving Office or the International Bureau (IB) as Receiving Office where at least one of the applicants is either a national or resident of the United States of America. However, the EPO is no longer a competent ISA, within the meaning of PCT Article 16(3), for international applications filed by US residents or nationals on or after 01 March 2002 in the USPTO or IB as Receiving Office, and where the application contains one or more claims directed to the fields of biotechnology or business methods. For the definition of what the EPO considers to be precluded subject matter in the fields of biotechnology and business methods, applicants should see the "Notice from the President of the European Patent Office," dated 26 November 2001, and which is published as Annex A in the "Notice Concerning EPO Competence to Act as PCT Authority" in the *Official Gazette* at 1255 O.G. 878, on February 19, 2002.

The European Patent Office may act as the International Preliminary Examining Authority (IPEA) for an international application filed in the United States Receiving Office or the International Bureau as Receiving Office where at least one of the applicants is either a national or resident of the United States of America, provided that the European Patent Office acted as the International Searching Authority. However, the EPO is no longer a competent IPEA, within the meaning of PCT Article 32(3), for international applications filed by US residents or nationals in the USPTO or IB as Receiving Office where the corresponding demand is filed with the EPO on or after 01 March 2002, and where the application contains one or more claims directed to the fields of biotechnology, business methods or telecommunication. For the definition of what the EPO considers to be precluded subject matter in the field of telecommunication, applicants should see the "Notice from the President of the European Patent Office," dated 26 November 2001, and which is published as Annex A in the "Notice Concerning EPO Competence to Act as PCT Authority" in the *Official Gazette* at 1255 O.G. 878, on February 19, 2002.

The search fee of the European Patent Office was increased, effective October 15, 2002, and was announced in the *Official Gazette* at 1263 O.G. 42, on October 8, 2002.

International fees were changed, effective on April 15, 2003, due to a change in the exchange rate of the U.S. dollar with regard to the Swiss franc, and were announced in the *Official Gazette* at 1268 O.G. 76 on March 25, 2003. A change in the maximum number of designation fees payable, with effect from January 1, 2002, was announced in the *Official Gazette* at 1253 O.G. 88, on December 25, 2001. A change in the reduction for electronic filing, with effect from April 15, 2003, was announced in the *Official Gazette* at 1268 O.G. 76, on March 25, 2003.

DEPARTMENT OF COMMERCE
United States Patent and Trademark Office
37 CFR Parts 1, 2, 3, 4, 5, 102, 104, and 150
[Docket No.: 2003-P-011]

Correspondence with the United States Patent and Trademark Office

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Final rule; Nomenclature change.

SUMMARY: The United States Patent and Trademark Office (Office) is revising the rules of practice to change the address for certain correspondence with the Office. The Office is preparing to move to Alexandria, Virginia. The Office is changing certain correspondence addresses so that all correspondence with the Office will now be routed through a United States Postal Service (USPS) facility that is more conveniently located to the Office. In addition, the Office is also changing the titles of Office officials as set forth in the rules of practice for consistency with the titles provided in the American Inventors Protection Act of 1999.

EFFECTIVE DATE: The changes in this final rule are effective May 1, 2003.

FOR FURTHER INFORMATION CONTACT: Darnell M. Jayne, Legal Advisor, Office of Patent Legal Administration, by telephone at (703) 308-6906, or by facsimile at (703) 746-3580.

SUPPLEMENTARY INFORMATION: The Office changed the address for trademark-related correspondence in December of 1996. *See Communications with the Patent and Trademark Office*, 61 FR 56439 (Nov. 1, 1996), 1192 *Off. Gaz. Pat. Office* 95 (Nov. 26, 1996) (final rule). With this change, trademark-related correspondence with the Office was routed through a USPS facility in Virginia, and most other correspondence with the Office was routed through a USPS facility in the District of Columbia. The Office is currently in the process of moving its principal office from Arlington, Virginia to Alexandria, Virginia. Since a USPS facility in Virginia is more conveniently located to the site of the Office's future principal office in Alexandria, Virginia, the Office is changing its correspondence addresses (other than for trademark-related correspondence) so that all correspondence with the Office will now be routed through a USPS facility in Virginia. In addition, selection of a USPS facility in Virginia as the new correspondence address is appropriate because the Office maintains and will continue to maintain its principal office in Northern Virginia.

General Mailing Addresses: The Office's three separate general mailing addresses are now as follows: (1) For correspondence processed by the organizations reporting to the Commissioner for Patents: Commissioner for Patents, PO Box 1450, Alexandria, Virginia 22313-1450; (2) For correspondence processed by the organizations reporting to the Commissioner for Trademarks or the Trademark Trial and Appeal Board: Commissioner for Trademarks, 2900 Crystal Drive, Arlington, Virginia 22202-3513; and (3) For other correspondence (including patent and trademark documents sent to the Assignment Division for recordation and requests for certified or uncertified copies of patent or trademark documents): Director of the United States Patent and Trademark Office, PO Box 1450, Alexandria, Virginia 22313-1450.

The above addresses are the Office's three general mailing addresses. The Office has separate mailing addresses for certain correspondence: *e.g.*, (1) Certain court-related correspondence (*e.g.*, a summons and complaint) being delivered to the Office via the USPS must be addressed: General Counsel, United States Patent and Trademark Office, PO Box 15667, Arlington, Virginia 22215 (§ 104.2); (2) correspondence directed to the counsel for the Office of Enrollment and Discipline (OED) Director relating to disciplinary proceedings pending before an Administrative Law Judge or the Director must be addressed: Office of the Solicitor, PO Box 16116, Arlington, Virginia 22215; (3) payments of maintenance fees in patents being delivered to the Office via the USPS should be addressed: United States Patent and Trademark Office, PO Box 371611, Pittsburgh, Pennsylvania 15250-1611; and (4) a deposit account replenishment being delivered to the Office via the USPS should be addressed: Director of the United States Patent and Trademark Office, PO Box 70541, Chicago, Illinois 60673. Persons filing correspondence with the Office should check the rules of practice, the *Official Gazette*, or the Office's Internet Web site (*http://www.uspto.gov*) to determine the appropriate mailing address for such correspondence.

The Office appreciates that it will take some period of time before all persons filing correspondence with the Office become accustomed to these address changes. The Office plans to arrange for continued delivery of correspondence addressed to the Office's former Washington, DC 20231 address as a courtesy for a limited period of time. The Office, however, has been experiencing delays and other problems with correspondence routed through the USPS facility at Brentwood. *See Processing of, and Requirements for, the Filing of Duplicate Applications and Papers in Patent Applications in view of USPS Mail Delays*, 1254 *Off. Gaz. Pat. Office* 92 (Jan. 15, 2002). Any correspondence addressed to the Office's former Washington, DC 20231 address that is delivered to the Office will still be subject to the delays and other problems associated with correspondence that is routed through the USPS facility at Brentwood.

In November of 2001, the Office also established a Post Office Box in Arlington, Virginia (PO Box 2327, Arlington, Virginia 22202) for use on an emergency basis, and indicated that it would continue to accept patent-related correspondence at this Arlington, Virginia Post Office Box and treat such correspondence as if it were addressed as set forth in 37 CFR 1.1 for purposes of 37 CFR 1.8 and 1.10 until further notice. *See Termination of the Suspension of the "Express Mail" Service of United States Postal Service for mail addressed to ZIP Codes 202xx through 205xx*, 1254 *Off. Gaz. Pat. Office* 33 (Jan. 1, 2002). The Office is hereby providing notice that persons submitting correspondence to the Office should no longer use this Arlington, Virginia Post Office Box for any correspondence (including sequence listings in electronic format) after May 1, 2003.

In addition, the Office is changing the various special Box designations to corresponding Mail Stop designations (*e.g.*, "Box 4" will now be "Mail Stop 4"). Since the address for certain correspondence includes a Post Office Box number, the continued use of special Box designations in the address might have resulted in confusion between the Post Office Box number and the special Box designation (especially when the special Box designation is a box number).

Finally, the titles "Commissioner of Patents and Trademarks," "Assistant Commissioner for Patents," and "Assistant Commissioner for Trademarks" were changed to "Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office," "Commissioner for Patents," and "Commissioner for Trademarks," respectively, in § 4713 of the American Inventors Protection Act of 1999 (AIPA). *See* Pub. L. 106-113, 113 Stat. 1501, 1501A-575 through 1501A-577 (1999).

This final rule also revises the rules of practice (with the exception of 37 CFR part 10) to reflect the current titles of Office officials as provided for in the AIPA.

Discussion of Specific Rules

Title 37 of the Code of Federal Regulations, is amended as follows:

Part 1: Part 1 is amended to: (1) Change each reference to "Commissioner" to read "Director"; and (2) change each reference to "Commissioner's" to read "Director's".

Section 1.1 is amended to: (1) Change the address for general correspondence to: Director of the United States Patent and Trademark Office, PO. Box 1450, Alexandria, Virginia 22313-1450 (with Mail Stop designations as appropriate); (2) change the address for patent-related correspondence to: Commissioner for Patents, PO. Box 1450, Alexandria, Virginia 22313-1450; and (3) add paragraph headings.

Section 1.1(a) is also amended to: (1) Place the mailing address for all Office of Public Records correspondence concerning both patents and trademarks (documents to be recorded by Assignment Services Division and requests for certified or uncertified copies of patent or trademark documents) in a new § 1.1(a)(4); and (2) eliminate the reference to the coupon orders as coupon practice was abolished in November of 2000 (*see Changes to Implement Eighteen-Month Publication of Patent Applications*, 65 FR 57023, 57030 (Sept. 20, 2000), 1239 *Off. Gaz. Pat. Office* 63, 69 (Oct. 10, 2000) (final rule)).

Section 1.1(a) is also amended to provide that all correspondence in an application involved in an appeal to the Board of Patent Appeals and Interferences (Board) during the period from when an appeal docketing notice is issued until a decision has been rendered by the Board as well as any request for rehearing of a decision by the Board should be mailed to: Board of Patent Appeals and Interferences, United States Patent and Trademark Office, PO Box 1450, Alexandria, Virginia 22313-1450. An appeal docketing notice is issued by the Board to notify the applicant that an appeal is ready for docketing at the Board. *See Revised Docketing Procedures for Appeals Arriving at the Board of Patent Appeals and Interferences*, 1260 *Off. Gaz. Pat.* Office 18 (July 2, 2002). Section 1.1(a) is also amended to provide that notices of appeal, appeal briefs, reply briefs, requests for oral hearing, as well as all other correspondence in an application involved in an appeal to the Board not otherwise provided for should be addressed as set out in § 1.1(a)(1)(i) (*i.e.*, Commissioner for Patents, PO Box 1450, Alexandria, Virginia 22313-1450). Section 1.1(a) is also amended to include the provisions formerly located in § 1.1(e) concerning patent interference correspondence, namely that except as an administrative patent judge or the Board may otherwise direct, all correspondence relating to patent interferences, or relating to patent applications or patents involved in an interference, should be mailed to: Mail Stop INTERFERENCE, Board of Patent Appeals and Interferences, United States Patent and Trademark Office, PO Box 1450, Alexandria, Virginia 22313-1450.

Sections 1.1(f) and 1.1(i) are redesignated as §§ 1.1(e) and 1.19(f), respectively. As discussed above, the provisions of § 1.1(e) are now located in § 1.1(a)(1)(iii). Section 1.1(g) was formerly reserved and § 1.1(h) is now deleted. Section 1.1(h) provided that an applicant should use "Box ITU" as part of the address when an applicant or the applicant's representative submits a statement of use under § 2.88, or a request for extension of time to file a statement of use under § 2.89. With this change, a statement of use and a request for an extension of time to file a statement of use will be considered properly filed if addressed to the general address for trademark documents in compliance with § 1.1(a)(2)(i): Commissioner for Trademarks, 2900 Crystal Drive, Arlington, Virginia 22202-3513. The Office is eliminating Box ITU because the Office's experience has been that the use of that box is not helpful in sorting mail.

Section 1.6(b) is removed and reserved. The USPS no longer maintains a "pouch" for correspondence addressed to the United States Patent and Trademark Office, and the USPS does not segregate correspondence addressed to the United States Patent and Trademark Office on the basis of the date of its receipt by the USPS.

Section 1.9 is amended to add a paragraph (j) to define Director as used in 37 CFR chapter I, except for 37 CFR part 10, as meaning the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office. 37 CFR part 10 currently defines "Director" as meaning the Director of the Office of Enrollment and Discipline. The Office plans to propose changes to part 10 in a separate rule making, and also plans to change the use of "Director" in part 10 for consistency with the remaining provisions of 37 CFR chapter I as part of that rule making (at which time the phrase "except for part 10" will be deleted from § 1.9(j)).

Section 1.15 is removed and reserved as its provisions have been supplanted by the provisions of part 102.

Section 1.25 is amended by adding a paragraph (c), which specifies how a deposit account holder may submit a payment to the Office to replenish the deposit account. A payment to replenish a deposit account may be submitted by making the payment by electronic funds transfer through the Federal Reserve Fedwire System. Deposit account holders who want to use the Federal Reserve Fedwire System must provide the following information to their bank or financial institution: (1) Name of the Bank, which is Treas NYC (Treasury New York City); (2) Bank Routing Code, which is 021030004; (3) United States Patent and Trademark Office account number with the Department of the Treasury, which is 13100001; and (4) the deposit account holder's company name and deposit account number. The deposit account holder should inform his or her bank or financial institution to use due care to ensure that all pertinent account numbers are listed on the transaction because the failure to include the proper deposit account number will delay the processing of the replenishment. A second method of making a payment to replenish a deposit account is by credit card or electronic funds transfer over the Office's Internet Web site (*www.uspto.gov*). Specifically, from the Office's Web site homepage (*www.uspto.gov*), click on the "Online Business" tab, and then click the "Revenue Accounting & Management" tab, and then click the "Maintain USPTO Deposit Accounts" tab. A third method of making a payment to replenish a deposit account is by mailing the payment with the USPS to: Director of the United States Patent and Trademark Office, PO Box 70541, Chicago, Illinois 60673. Finally, a fourth method of making a payment to replenish a deposit account is by mailing the payment with a private delivery service or hand-carrying the payment to: Director of the United States Patent and Trademark Office, Deposit Accounts, One Crystal Park, 2011 Crystal Drive, Suite 307, Arlington, Virginia 22202.

Further information on deposit account replenishment may be obtained from the Office's Internet Web site (*http://ww.uspto.gov/web/offices/ac/comp/fin/electron.htm*), or by contacting the Deposit Account Division at 703-305-4631.

Section 1.51(a) is amended to change "Commissioner of Patents and Trademarks" to "Director of the United States Patent and Trademark Office" for consistency with the change in nomenclature.

Sections 1.53(d)(9), 1.417, and 1.434(a) are amended to change their special Box designations to corresponding Mail Stop designations.

Section 1.302(c) is amended to provide that notices of appeal directed to the Director shall be mailed to or served by hand on the General Counsel as provided in § 104.2.

Section 1.434(d)(2) is amended to correct a grammatical error.

Section 1.480(b) is amended to change its special Box designation to a corresponding Mail Stop designation. Section 1.480(b) is also amended to add a reference to PCT Rule 53 (which provides for Demands under the PCT).

Section 1.627(a) is amended to change the reference to § 1.1(e) to a reference to § 1.1(a)(1)(iii) for consistency with the changes to § 1.1.

Section 1.676(d) is amended to change the address to the correspondence address set out in § 1.1(a)(1)(iii).

Section 1.740(a)(13) is amended to change "Commissioner of Patents and Trademarks" to "Director of the United States Patent and Trademark Office" for consistency with the change in nomenclature.

Changes to Implement Electronic Maintenance of Official Patent Application Records

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Notice of proposed rule making.

SUMMARY: The United States Patent and Trademark Office (Office) has established a 21st Century Strategic Plan to transform the Office into a quality-focused, highly productive, responsive organization supporting a market-driven intellectual property system. One priority of the 21st Century Strategic Plan is the beginning-to-end electronic processing of patent applications. The Office is proposing changes to the rules of practice in this notice to adapt to a patent electronic image management system. Specifically, the changes proposed in this notice facilitate electronic data capture and processing, streamline the patent application process, and simplify and clarify the pertinent provisions of the rules of practice.

DATES: To be ensured of consideration, written comments must be received on or before April 24, 2003. No public hearing will be held.

ADDRESSES: Comments should be sent by electronic mail message over the Internet addressed to: *PatentEFW.comments@uspto.gov*. Comments may also be submitted by mail addressed to: Box Comments—Patents, Commissioner for Patents, Washington, DC 20231; or by facsimile to (703) 872-9411, marked to the attention of Robert Clarke. Although comments may be submitted by mail or facsimile, the Office prefers to receive comments via the Internet. If comments are submitted by mail, the Office would prefer that the comments be submitted on a DOS formatted 3 1/2 inch disk accompanied by a paper copy.

The comments will be available for public inspection at the Office of Patent Legal Administration, Office of the Deputy Commissioner for Patent Examination Policy, located at Room 3D65 of Crystal Plaza 3/4, 2201 South Clark Place, Arlington, Virginia, and will be available through anonymous file transfer protocol (ftp) via the Internet (address: *http://www.uspto.gov*). Since comments will be made available for public inspection, information that is not desired to be made public, such as an address or phone number, should not be included in the comments.

FOR FURTHER INFORMATION CONTACT: Robert A. Clarke ((703) 305-9177), Senior Legal Advisor, or Robert J. Spar ((703) 308-5107), Director, Office of Patent Legal Administration (OPLA), directly by phone, or by facsimile to (703) 305-1013, marked to the attention of Mr. Clarke, or by mail addressed to: Box Comments—Patents, Commissioner for Patents, Washington, DC 20231.

SUPPLEMENTARY INFORMATION: The Office is increasing the integrity of its internal patent application record maintenance by adopting a new electronic data processing system for the storage and maintenance of all the records associated with patent applications. Because the system is consistent with the data processing system used by the European Patent Office (EPO), it will also improve information exchange among the Intellectual Property Offices.

The system will use image technology to replace the standard paper processing of patent applications currently used in the Office. The paper document application file contents (including the specification, oath or declaration, drawings, information disclosure statements, amendments, Office actions, and file jacket notations) of pending applications will be scanned into electronic image files. All processing and examination will be performed with the electronic image files, instead of the paper source documents, by all Office personnel.

The system will affect applicants minimally during the patent application process, because the program affects internal operations and not external communications. Applicants will continue to send and receive Office correspondence in paper form, although the Office encourages use of the existing alternative electronic filing system resources for application filings and certain information disclosure statement submissions. The proposed changes to the rules of practice in title 37 of the Code of Federal Regulations (CFR) are designed to improve internal operations' use of the electronic format, primarily by easing the requirements upon applicants in amendment practice and information disclosure statement submissions. The electronic nature of patent records permits their viewing by the public through the Patent Application Information Retrieval (PAIR) system, which has a number of advantages: it provides notice to applicants of certain examination processing activities (*e.g.*, mailing of Office actions); it assures confidence in the integrity of the Office records; it reduces the handling of the records; and it allows parallel processing of the application by various parts of the Office.

The technology and procedures for the new system are similar to those used at the EPO, but adapted to the Office's legal requirements and existing computer systems. The Office has incorporated the experience and lessons learned from the previously announced prototype program (*USPTO Announces Prototype of Image Processing*, 1265 *Off. Gaz. Pat. Office* 87 (December 17,2002)) into a production system for all patent applications.

The electronic format of applications will reduce delays in moving information within the Office and between the Office, the applicant, other Intellectual Property (IP) Offices and other parties having authority to view the records. It will also reduce the potential for loss of records and misfiling, provide the capacity for multiple parties to access the records simultaneously, improve the efficiency of the publication process, and set the Office up for subsequent improvements in electronic communication related to applications between the Office, the applicant, and other parties.

It is also anticipated that the system will facilitate the sharing of information between the Office and other IP Offices. The Office anticipates that agreements to electronically transmit priority documents to certain other IP Offices as well as search results and other application information will be negotiated shortly. Transmission of priority documents electronically directly to the other IP Offices on request of the applicant is anticipated to reduce the overall costs to the applicant and to the other IP Offices (which would receive the certified copy in a format that is easily stored and retrieved on demand). In tandem with this effort is a parallel effort to promote the sharing of information (*e.g.*, search results) concerning related applications by the various IP Offices in order to reduce duplication of efforts, improve the efficiency and quality of examination efforts, and decrease workload. Thus, it is anticipated that the Office's migration to an electronic environment together with international negotiations will improve the efficiency and work quality of the Office.

Discussion of Specific Rules

Section 1.3: Section 1.3 is proposed to be amended to provide that papers presented in violation of the decorum and courtesy requirement will not be entered. The Office is capturing electronic images of all documents (papers) that will be the official records of certain applications. If the Office has captured the image as an electronic sheet(s), the Office would electronically remove the document from the Official file (the collection of documents related to a patent application or patent and which would be in this instance an electronic file) and from the Office computer systems. If the Office has not captured the image, the paper would not be entered in the Official file (which would in this instance be a paper file). In either event, the Office would provide notice in the Official file that the paper will not be available to the public. If the paper is intended as a reply to an Office action, the reply will not be considered a *bona fide* reply under § 1.135(c) and the period set in the prior Office action will continue to run. Similarly, a paper submitted in violation of § 10.10(b) that is intended as a reply will not be entered in the Official file and will not be treated as an unsigned reply (nor as a signed reply). Therefore, the reply will not toll the time period set in a prior Office action.

Section 1.9: Section 1.9 is proposed to be amended to clarify that the word "paper" and "papers" refer to a document or documents, which may be electronic records or physical paper sheet(s).

Section 1.14: Section 1.14 explains that applications for patents are generally preserved in confidence, and sets forth the special circumstances (35 U.S.C. 122(a)) under which a member of the public may have information about, copies of, or access to a patent application. Section 1.14 is proposed to be revised to clarify the rule and to expand the rule to provide for electronic files and electronic exchange of documents.

Paragraph (a)(1) has been rewritten to list the records that are available. The term "file wrapper and contents" has been replaced with the term "file contents" to avoid confusion with the paper (non- electronic) file jacket and its contents. Paragraph (a)(1) rephrases the provisions of current §§ 1.14(c) and (e) to assist the public in understanding what applications are available to the public. Accordingly, paragraph (a)(1), as rewritten, is divided into paragraphs (a)(1)(i) through (a)(1)(vi) listing different types of application files and explaining whether any part of the file content is available to the public. For example, paragraph (a)(1)(iii) explains that published pending applications are available to the public, upon written request, and payment of the appropriate fee, and that the original paper file of the pending application that was published as a patent application publication is not available to the public. In addition, it is proposed in the new paragraphs (a)(1)(iv) and (a)(1)(v) that where the benefit of an application is relied upon pursuant to 35 U.S.C. 119(e), 120, 121 or 365 in certain applications, the application will be available in the same manner that the application would have been had the application been referenced in a U.S. patent or U.S. patent application publication. As a result of this proposed rule change if an application is filed as a continuation of an earlier application, and the USPTO publishes the continuation as a patent application publication without a reference to the earlier application, the earlier-filed application will still be available to the public (either the originally filed application or the entire application file, depending upon whether the earlier-filed application is abandoned).

Paragraph (a)(2) is proposed to be revised to combine and restate current §§ 1.14(a)(1) and (b). The application number of any application that claims the benefit of the filing date of a patent or an application that has been published may be obtained from the Patent Application Information Retrieval (PAIR) system on the Office's web site at: *http://pair.uspto.gov*.

Section 1.14 is also proposed to be amended to have a new paragraph (b), to explain that electronic access may be provided to all or part of certain applications. Following migration to an electronic image file as the Official file of patent applications, access will be provided solely to the electronic Official file and not to the original paper document sheets used to create electronic images within the Official file.

Proposed § 1.14(c) is the same as current § 1.14(d). Paragraph (d) of current § 1.14 is proposed to be redesignated as § 1.14(c).

Proposed § 1.14(d) is the same as current § 1.14(f). Paragraph (f) of current § 1.14 is proposed to be redesignated as § 1.14(d).

Section 1.14 is also proposed to be amended to have a new paragraph (e), to provide that the Office may share its electronic application files that have not been published or otherwise made available to the public with another Intellectual Property (IP) Office pursuant to an agreement between the Office and another IP Office and if the applicant expressly consents. The written consent must be filed in the Office for the Office to transmit, or allow access by the other IP Office, to the application or other records associated with the application. The migration to an electronic environment will allow the Office to participate with other IP Offices in more rapid exchange of information, such as priority documents, between IP Offices. It should be noted that following publication, or where the application is otherwise available to the public, the written consent of applicant is not required before access to the application file is provided.

Paragraph (f) of § 1.14 corresponds to paragraph (g) of current § 1.14, which is proposed to be amended to move the text from (g) and of paragraph (g)(1) to paragraph (2), and to provide in the new paragraph (1) that any action of the Board of Patent Appeals and Interferences (BPAI), or any decision on petition, may be published or made available for public inspection without applicant's or patent owner's permission if rendered in a file open to the public pursuant to § 1.11 or available pursuant to § 1.14(e)(2), an application that has been published in accordance with §§ 1.211 through 1.221, or in an application claiming priority to, or the benefit of, an earlier filing date under 35 U.S.C. 119(a)-(d), 120, 121 or 365 of an application that has been published or patented. In paragraph (2), the rule would provide that an action of the BPAI, or any decision on petition, not publishable under paragraph (1) of this section, may be published or made available for public inspection if the Director believes the action or decision involves an interpretation of patent laws or regulations that would be of important precedential value; and the applicant, or any party involved in the interference, does not within two months after being notified of the intention to make the action or decision public, object in writing on the ground that the decision discloses a trade secret or other confidential information and states that such information is not otherwise publicly available. If an action or decision discloses such information, the applicant or party shall identify the deletions in the text of the action or decision considered necessary to protect the information. If the applicant or the party considers that the entire action or decision must be withheld from the public to protect such information, the applicant or party must explain why. Applicants or parties will be given time, not less than twenty days, to request reconsideration and seek court review before any portions of actions or decisions are made public over their objection. This procedure is the same as that of current paragraph (g)(2), but has been reworded for clarity and also to use the terminology "any action" of the BPAI or "decision on petition" would be publishable, whereas the current rule uses the terminology "decision by the Director or the BPAI".

Generally, patent applications are maintained in confidence unless the Director finds "special circumstances" due to which information about an application or the application itself may be released. See 35 U.S.C. 122(a). Section 1.14 sets forth when some such "special circumstances" have been found, and specifies when release of information about an application or access to all or part of an application may be provided without a petition. Accordingly, as one example of a "special circumstance," as proposed to be amended with new paragraph (f)(1), a BPAI decision would be published, even if the decision does not involve an interpretation of patent laws or regulations that would be precedential so long as the application claims priority to or the benefit of an earlier application that has been published or patented (*e.g.*, a Japanese patent application). The BPAI decision would be published even if the application in which the decision was made requests nonpublication of the application, and the application is not itself patented.

Proposed § 1.14(g) is the same as current § 1.14(h), which is proposed to be redesignated as § 1.14(g).

Proposed paragraph (h) of § 1.14 corresponds to current § 1.14(i), and is further proposed to be amended to explain the meaning of the terms "Home Copy," "Search Copy," and "Examination Copy," and by inserting "of the publication" after "English language translation" in paragraph (b)(2). Section 13204 of Public Law 107-273 made a technical change to the provisional rights provisions of the patent statute as to international applications to clarify that a translation of the international publication, as opposed to the international application, is required to be filed in order for a patent owner to obtain provisional rights pursuant to 35 U.S.C. 154(d). In view of this change to the statute, the corresponding reference to the translation in § 1.14 is proposed to be changed to add "a publication of an international patent application" after "English language translation of." In addition, it is proposed that the parenthetical phrase at the end of paragraph (h)(1), referencing the fee for a copy of an international application file, or a copy of a document in a file, be changed from a reference to § 1.19(b) rather than § 1.19(b)(2) or § 1.19(b)(3), the fees for the contents of a file or a CD, and the parenthetical phrase at the end of paragraph (h)(2), referencing the fee for a copy of an English language translation in a file, be corrected to refer to § 1.19(b)(4), the fee for a document, rather than § 1.19(b)(2) or § 1.19(b)(3).

Proposed § 1.14(i) is the same as current § 1.14(j), which is proposed to be redesignated as § 1.14(i)

As proposed to be amended, § 1.14 will apply to all patent applications filed before, on, or after the date that the amendment to § 1.14 becomes final.

Section 1.17: Section 1.17 is proposed to be amended to eliminate the reference to returning information in paragraph (h) because expunged information will not be returned under § 1.59 as proposed to be amended.

Section 1.19: Section 1.19 is proposed to be amended by revising paragraph (b)(1) to eliminate the fee for providing an electronic copy of an application as filed to another IP Office if applicant consents in writing by filing an authorization under 35 U.S.C. 122(a) to permit the Office to exchange information related to the entire file record of the application with the other IP Office. The electronic transmission would serve as the certified copies of applications as filed that can be required by the other IP Offices under Article 4(D)(3) of the Paris Convention.

Section 1.52: Section 1.52 is proposed to be amended to clarify the requirement for proper paper sizes in paper communications submitted to the Office and to set forth the analogous requirements for electronic communications.

The Office plans to capture electronic images of all documents that form the record of patent examination. These images will form the Official file of the application. Applicants will have the option of submitting application documents and other communications to the Office on paper, by facsimile transmission, or via the Office's electronic filing system (EFS). The existing requirements for paper and facsimile submissions (as well as the prohibition against filing patent applications by facsimile, see § 1.6(d)(3)) are retained, and the requirements for electronic submissions are added. One newly added requirement for paper submissions requires that the papers not be permanently bound because the papers must be readily separable for scanned entry into the image system. The use of binder clips or standard office staples will generally be acceptable. The detailed requirements for electronic submissions are provided in the Office's EFS documentation (available electronically at http://www.uspto.gov) and the proposed amendments direct the affected party's attention to those requirements.

Paragraph (a)(1) of § 1.52 is proposed to be amended to clarify that it pertains to paper and facsimile submissions, and that such submissions not be permanently bound together.

Paragraph (a)(2) of § 1.52 is proposed to be amended to clarify that it pertains to paper and facsimile submissions.

Paragraph (a)(3) of § 1.52 is proposed to be amended to clarify that it pertains to paper and facsimile submissions.

Paragraph (a)(5) of § 1.52 is proposed to be amended to clarify that it pertains to paper and facsimile submissions.

Paragraph (a) of § 1.52 is also proposed to be amended by adding paragraphs (a)(6) and (a)(7) to set forth that papers submitted electronically must comply with the Office's EFS requirements and that failure to comply will result in a requirement for correction.

Paragraphs (b)(3) and (b)(4) of § 1.52 are proposed to be amended to clarify that the requirements for the abstract and claims to begin on a separate sheet on physical paper are similarly required to begin on a separate electronic page in an electronic submission.

Paragraph (b)(7) of § 1.52 is proposed to be amended to explain the consequences of a failure to provide compliant papers within the set time period. That is, as proposed to be amended, the rule will provide that compliant papers must be provided within the set time period in order to avoid abandonment of the application in the case of an applicant for patent, termination of proceedings in the case of

a patent owner in a reexamination proceeding, or refusal of consideration of the papers in the case of a third party requester in a reexamination proceeding.

Section 1.59: Section 1.59 is proposed to be amended to eliminate references to returning documents that have been expunged to recognize that, with electronic Official files, there will be nothing to return when a paper is expunged. The Office is capturing electronic images of all documents that form the Official file. Where the image is generated from a physical source document, the originating document may be disposed of once the electronic image accuracy is verified. Therefore, if a document is to be expunged from the record, the only operation that will be required will be removal of the image from the Official file. Paragraph (a)(1) of § 1.59 is proposed to be amended by deleting the phrase "and returned" from the first sentence, and deleting the second sentence. Paragraph (b) of § 1.59 is proposed to be amended by deleting the phrase "and return" from each of the first and second sentences.

Section 1.71: Section 1.71 is proposed to be amended by adding a new paragraph (f) to require that the first page of a specification commence on a new sheet and to require that no sheet including part of the text of the specification include any other material. Claims must also commence on a new sheet and in accordance with the proposed changes to § 1.75, must not include other parts of the application.

Section 1.72: Paragraph (b) of § 1.72 is proposed to be amended to prohibit the paper presenting the abstract to include any other portions of the application or other material. Presentation of material other than the abstract on the same page as the abstract makes the electronic indexing of the application more difficult. In addition, it is proposed to remove the last sentence of paragraph (b) to eliminate the prohibition on using the abstract to be used to interpret the claims to conform the rule to be consistent with Federal Circuit case law. *See Hill-Rom Co. v. Kinetic Concepts, Inc.*, 209 F.3d 1337, 1341 n.*, 54 USPQ2d 1437, 1440 n.1 (Fed. Cir. 2000).

Section 1.75: Paragraph (h) of § 1.75 is proposed to be amended to prohibit a paper presenting claims from including any other portions of the application or other material. Presentation of material other than the claims on the same page as one or more claims makes the electronic indexing of the application more difficult.

Section 1.97: Section 1.97 is proposed to be amended to move the last date on which an information disclosure statement (IDS) may be filed to the day prior to the mailing of the next Office action from the Office.

Sections 1.97(b) and (c) are proposed to be amended to move the last date onwhich an IDS may be filed from the day of mailing of an Office action to the day before the mailing of an Office action.

Section 1.97(b)(3) is proposed to be amended to require filing of an IDS before the day of the mailing of the first Office action.

Section 1.97(b)(4) is proposed to be amended to require filing of an IDS before the day of the mailing of the first Office action after the filing of a request for continued examination under § 1.114.

Section 1.97(c) is proposed to be amended to require filing of an IDS before the day of the mailing of any of a final action under § 1.113, a notice of allowance under § 1.311, or an action that otherwise closes prosecution in the application, provided it is accompanied by one of: (1) The statement specified in § 1.97(e); or (2) the fee set forth in § 1.17(p).

With PAIR, applicants can easily determine when Office actions are mailed by reviewing the change of status information for an application that is available over the Internet. Unless applicants are required to submit an IDS before Office actions are mailed, applicants may unfairly delay prosecution to meet their short-term needs by mailing an IDS on the same day as Office actions are mailed upon seeing that a mailing occurred through PAIR. Therefore, in order to promote efficient processing and provide the benefits of PAIR, a change in the "mailing rule" is being proposed.

Section 1.98: Section 1.98 is proposed to be amended by adding a new paragraph (e), which provides that the requirement in § 1.98(a)(2)(i) for a copy of all listed U.S. patents and U.S. patent application publications does not apply to any IDS submitted in compliance with the Office's electronic filing system. Thus, for any IDS submitted to the Office via the Office's EFS, paper copies of U.S. patents and U.S. application publications cited in the IDS would no longer have to be supplied by applicants.

An EFS software upgrade has added an IDS, submitted under the provisions of §§ 1.97 and 1.98, as a type of electronic submission that may be made via the Office's EFS. Currently, the EFS may only be used to submit: (1) Certain non-provisional utility patent applications; (2) provisional applications; (3) biotechnology sequence listings; (4) copies of patent applications for purposes of having the copies of the patent application published (redacted publication, republication as amended, or voluntary publication); (5) assignments of patents and applications; and (6) Information Disclosure Statements. *See Legal Framework for the Use of the Electronic Filing System,* 1263 *Off. Gaz. Pat. Office* 60, 61 (Oct. 8, 2002). With the EFS software upgrade, an applicant is able to electronically transmit an IDS with the filing of a new utility patent application, or as a subsequent filing. This EFS software upgrade is NOT usable for third party information disclosure submissions under § 1.99. The IDS submission via EFS is the only electronic substitute for a paper IDS submission contemplated. EFS has been available to the general public for limited electronic filing since October 2000. *See Electronic Filing System Available to Public,* 1240 *Off. Gaz. Pat. Office* 45 (Nov. 14, 2000).

Applicants may file an IDS via EFS by (1) entering the references' citation information in a fillable electronic form, equivalent to the paper PTO-1449 form (or revised form PTO/SB/08A and 08B) by using EFS software; and (2) transmitting the fillable electronic form data to the Office via EFS. This electronic EFS form currently allows only citations for U.S. patents and U.S. patent application publications. If any references to foreign patent documents or non-patent literature documents or unpublished U.S. applications are to be cited, then applicants will continue to submit those citations on a separate, conventional paper PTO-1449 form (or equivalent form) delivered with a printed copy of each cited foreign patent document, non-patent literature document and unpublished U.S. application via mail, facsimile transmission, or hand delivery. Applicants need not send the Office copies of any U.S. patent or U.S. application publication documents cited on a fillable electronic IDS form that is electronically transmitted to the Office via EFS. In those instances in which an applicant sends an IDS on the same day by EFS and by conventional delivery, and a fee under § 1.97 is due, only one fee will be due if the applicant informs the Office in the conventional submission that such a submission is associated with an electronic submission on the same day in which the fee was paid.

The EFS software provides a fillable electronic IDS form equivalent to a paper PTO-1449, Information Disclosure Statement form, in which citations for up to 50 U.S. patents and up to 50 U.S. patent application publications may be entered. This EFS fillable form has fields where statements of relevance and where notifications that the documents were cited in a communication from a foreign patent Office in accordance with § 1.97(e) may be given. The EFS upgrade validates the format of data entered into the fillable electronic IDS form and provides the means to specify whether this fillable EFS IDS form is to be linked to an accompanying new application filing or is being filed in a previously filed application, and transmit the XML formatted IDS data on the fillable electronic form to the Office. The EFS software also provides fields to enter required fee payment information under §§ 1.97(c)(2) and (d)(2).

The fillable, EFS IDS form will be entered as a paper (but will actually be part of an electronic database) into the application file contents indicating that it was received on the date the complete transmission containing the form was received in the Office via EFS. This is the date the Office will refer to in considering compliance with § 1.97.

Examiners will consider the U.S. patents and U.S. application publications cited on an EFS transmitted IDS form provided the remaining requirements of §§ 1.97 and 1.98 are met, by reviewing

electronic or printed copies produced from the Office's electronic databases. It will be most important that the cited patent and application publication numbers be accurate and devoid of transcription error. There will be no applicant-provided copies of the disclosed documents in the application file for the examiner to review. Instead, because the Office will electronically retrieve the patents and application publications so identified by those numbers, the examiner will only be able to consider the documents so identified. As a corollary, examiners will only consider what is actually cited. Where, for example, an error is made in transcribing a U.S. patent number, and the examiner, after retrieving the patent associated with the number as entered in the IDS, determines that the patent associated with the number as entered in the IDS is not the correct number, because the inventor's name and issue date entered in the IDS does not match the corresponding data on the patent associated with the patent number entered in the IDS, the examiner will follow the procedure regarding the handling of non-complying information disclosure statements set forth in section 609 III(C)(1) of the *Manual of Patent Examination Procedure* (8th ed. 2001) (MPEP). The examiner may either initial the paper copy printed from the electronic IDS to indicate that the erroneously cited patent has been reviewed or line through the citation as not in compliance with § 1.98.

The only procedure for having such documents considered when an erroneous patent or application publication number is cited in an eIDS will be by citing the correct document identifying number in a subsequent IDS, either paper or electronic, that conforms to the requirements of §§ 1.97 and 1.98, as specified in MPEP 609 III(C)(1) regarding corrections of the information in non-complying information disclosure statements.

The IDS may be submitted as part of an EFS electronic application filing, or subsequent to an application filing, either in paper or via EFS. The ePAVE program will prompt the filer to associate an IDS file with a new application file and to provide payment information, where either is appropriate. As with the other types of electronic submissions, ePAVE will validate the format, display it to the filer, prompt for the filer's electronic signature, use the filer's digital certificate (a digital certificate may be obtained from the Office's Electronic Business Center), to encrypt the whole package, and transmit the submission to the Office. Upon receipt, the Office will send to the filer an electronic post card "Acknowledgement Receipt", including a server date stamp, a unique server number, the application number, and confirmation of the number of the files received by the Office. If the IDS submission is subsequent to the application filing, the filer will be required to enter both an application number and a confirmation number. A confirmation number is an additional four-digit identifier assigned to an application, and can be found in the upper left-hand corner of the official filing receipt. A filer will be required to have a customer number, obtained from the Office's Electronic Business Center, and an Office provided digital certificate to use EFS as with current practice.

Section 1.99: Section 1.99 is proposed to be amended to provide that the Office will not enter any explanation of the patents or publications, or any other information (that is not limited to patents or publications) included in a submission. The Office will also not enter a submission that is not in compliance with the requirements of this section. The Office is capturing electronic images of all documents that form the Official file of certain applications and the original paper documents, if stored, will be stored off-site and will not be easily accessible, and if destroyed, will not be available. Therefore, any submission, or part of the submission, that is not in compliance with this section would not be captured as electronic images and, if such documents have been entered into the Official file, the Office will electronically remove the documents from the Official file.

Paragraph (d) of § 1.99 is proposed to be amended by deleting the word "dispose of" and replacing it with "not enter." Paragraph (e) of § 1.99 is proposed to be amended by deleting the phase "returned or discarded" and replacing it with "will not be entered".

Section 1.121: The manner of making amendments to the specification, claims and drawings is being revised with proposed changes to § 1.121. While the process of making amendments would generally remain the same, relying on the use of replacement versions of the specification, claims and drawing figures, the process for submitting amendments is simplified. The submission of two versions (clean and marked-up) of amended subject matter, and the attendant editorial difficulties associated with this practice, will no longer be required other than for substitute specifications. For amending the specification (§ 1.121(b)(1) and (b)(2)), applicants would be required to submit a replacement paragraph or section marked-up to show changes relative to the immediate prior version. No clean version of replacement paragraphs or sections would be required. When the specification is to be amended extensively, a substitute specification marked-up to show changes relative to the immediate prior version would be submitted, as per § 1.125 which is invoked by § 1.121(b)(3). In this situation, a clean version of the specification would also be required, as per current § 1.125(c). For amending the claims (§ 1.121(c)), applicants would be required to provide replacement claims (marked-up to show changes relative to the immediate prior version) as part of a complete listing of all the claims in the application each time a claim is amended, which listing would include the status of each claim, and the text of each pending claim under examination. No separate clean version would be required at the time a claim is amended. For amending drawing figures (§ 1.121(d)), applicants would be required to submit a replacement figure with the changes made. No pre-approval of proposed changes in red ink will be required. In each situation, an explanation of the changes must be supplied.

This proposed revised process for amending the specification, claims and drawing figures of pending patent applications will further facilitate the advent of electronic examination in the Office. The principal feature of this proposal, and the one which would most significantly impact the examination process, would require that a complete listing of claims (which includes the status of all claims and the text of pending claims under examination) be submitted as part of each amendment document that includes any amendments to the claims, with the complete listing totally replacing any and all previous versions of claims throughout an application. The conversion of all paper-based application files into electronic image format, together with the proposed changes to amendment practice, will enable the complete listing of all of the claims to be conveniently located and easily accessed on a computer screen for review by a patent examiner or the applicant, or where the application is open to the public.

In order to promote uniformity and consistency of practice, the Office, in the proposed changes to § 1.121, would require applicants to utilize only strike-through for deleted subject matter and underlining for added subject matter as markings to show changes made. No other method of markings will be permitted.

As a result of the adoption of the proposed changes to § 1.121, applicants will, in most cases, no longer be required to reproduce lengthy segments of the specification in both clean and marked-up versions. Only a marked-up version of a replacement paragraph or section will be required. Where a substitute specification has been provided because of extensive amendments, the substitute specification should be supplied as a clean replacement version, which will be entered. A marked-up version is also necessary to the examination process to show the examiner the changes that were made. These requirements are the same as the current requirements of § 1.125(b) and (c) for submitting a substitute specification. With respect to the claims, the proposed changes will result in the filing of a complete listing of all of the claims in the application, and the status of each claim (in the listing), in a single amendment document each time an amendment to the claims is made. The status of every claim will be indicated in a parenthetical expression following each claim number, using the identifiers "(original)", "(previously amended)", "(currently amended)", etc. Only the claims being changed at the time an amendment is filed will include the markings to show the changes. Claims not currently amended will be presented in the same amendment document in clean version. Applicants will no longer be required to submit both a clean version and a separate marked-up version of claims being changed. Further, the submission of a clean version in addition to a marked-up version is strongly discouraged. Dual versions (clean and marked-up) may get confused and the wrong version may get entered into the application file. In such an event, an incorrect

message would be given, as providing any claim text in clean version will be taken to be an assertion by applicants that no changes have been made relative to the immediate prior version. The burden of ensuring accuracy between the most recent and the prior versions would be borne by applicants.

Amendments to a drawing figure will be made by submitting the actual changes in a replacement drawing sheet which is in compliance with § 1.84. If multiple drawing figures are on a single drawing sheet, the replacement drawing sheet should include the figures which have not been revised as well as the revised drawing figure(s). A detailed explanation of each of the changes made to a drawing figure must also be provided in a separate section of the amendment document. If the changes are not acceptable to or approved by the examiner, the applicant would be notified and given a requirement for corrective action in the next Office action. In the absence of an objection to the drawings, no further drawing submission by applicant will be required.

The proposed changes to amendment practice, if adopted in the final rule, will provide amendments ready for scanning and indexing into an electronic image format and incorporated into an electronic file wrapper that will be available and accessible to examiners on their individual PCs for further examination. Due to the large backfile of pending applications in the Office, the implementation of the scanning system and the creation of electronic file wrappers will be phased into the technology centers over a period of time. The proposed changes to the rule will require applicants to consolidate all of the claims of any currently pending application into a single amendment document each time any claim is amended, or a new claim is added. In the final rule, if it is adopted as proposed, all amendment documents will be required to include the full text of all pending claims (except for withdrawn claims) with their status in parentheses after the claim numbers, as well as an indication of the status of any claims which have been currently or previously canceled or withdrawn.

Section 1.121(b) is proposed to be amended to clarify that applicants must make amendments to the specification by use of (1) replacement paragraph, or (2) replacement section. Provisions for submitting a substitute specification have been cross-referenced to § 1.125. Provisions for amending claims are provided for in other sections of this rule (paragraph (c)).

It is proposed that paragraphs (b)(1)(ii), (b)(2)(ii) and (b)(3)(ii) be changed to require that the amendment include a version of the amended paragraph, section or substitute specification (by reference to § 1.125) marked-up to show the changes by using "strike-through" as the method for showing deletions of subject matter in the specification. Similarly the Office proposes to require underlining to show additions of subject matter. Only strike-through and underlining should be used as the method to show changes.

It is further proposed to eliminate current paragraphs (b)(1)(iii), (b)(2)(iii) and (b)(3)(iii).

It is proposed to add new paragraph (b)(5) to indicate that precise instructions as to location of the changes must be provided for entry of amendments to the specification. Deletion of a paragraph or section may be made by instruction to cancel only; no actual text to be canceled should be submitted. Once an amended paragraph, section, or substitute specification is presented in an amendment document, there is no further need for the applicant to re-present the amended submission in a subsequently filed amendment document.

It is proposed to replace current paragraphs (c)(1) through (c)(3) with revised paragraphs (c) and (c)(1) through (c)(5). Paragraph (c) as revised would provide for a total rewriting of a claim each time the claim is amended, including markings to show the changes being made relative to the immediate prior version of the claim. This section would also require submitting a complete listing of all pending claims in the application, including the status of each and every claim in every amendment document that includes an amendment to the claims. This listing would replace all prior versions of the claims (except for any withdrawn claims), and listings of the claims in the application. The claim status required with each amendment document would be indicated in a parenthetical expression following the claim number. The status of all claims in the application, even those previously canceled or withdrawn, would be indicated with each amendment document.

In order to promote uniformity and consistency, only the following defined identifiers should be used to indicate the status of the claims (in parentheses after the claim number):

(Original): Claim filed with the application
(Currently amended): Claim being amended in the current amendment document
(Previously amended): Claim not being currently amended, but which was amended in a previous amendment document
(Canceled): Claim deleted from the application
(Withdrawn): Claim still in the application, but in a nonelected status
(Previously added): Claim added in an earlier amendment document
(New): Claim being added in the current amendment document
(Reinstated—formerly claim #_): Claim deleted in an earlier amendment document, but represented with a new claim number in current amendment
(Previously reinstated): Claim deleted in an earlier amendment and reinstated in an earlier amendment document
(Re-presented "formerly dependent claim #_): Dependent claim re-presented in independent form in current amendment document
(Previously re-presented): Dependent claim re-presented in independent form in an earlier amendment, but not currently amended

As a result of this proposed change, each amendment document would be self-contained, *i.e.*, it would include a complete set of claims for examination and would provide the status of all of the claims in one location in the file.

An example of how the claims, and the status of the claims, would be presented is as follows (use of the word "claim" before the claim number is optional):

Claims 1-5 (canceled) (Note: consecutive canceled or withdrawn claims may be aggregated)
Claim 6 (withdrawn)
Claim 7 (previously amended): A bucket with a handle
Claim 8 (currently amended): A bucket with a green blue handle
Claim 9 (withdrawn)
Claim 10 (original): A bucket with a wooden handle
Claim 11: (new): A bucket with plastic sides and bottom

Paragraph (c)(1) would require the use of strike-through (for deletions) and underlining (for additions) to indicate how an amended claim differs from its immediate prior version. The proposed amendment to this section eliminates the previously accepted use of equivalent marking systems. No other method of markings or comparison (other than strike-through and underlining) would be permitted. Only claims of the status "currently amended" would include markings showing changes made.

Paragraph (c)(2) would require that the current amendment document include not only the marked-up version of claims being currently amended, but also the submission of a clean version of pending claims not being amended in the current amendment document. The presentation of clean text (not underlined) in any claim would constitute an assertion that no changes have been made from the immediate prior version of the same claim. This would relieve the Office of the burden of cross-reading various versions of the same claim to ensure accuracy of rewritten claims. The text of canceled or withdrawn claims should not be presented in each amendment document; these claims should be indicated as being in the status of "(canceled)" or "(withdrawn)".

Paragraph (c)(3) would provide for the cancellation of any claim by mere instructions to cancel. If no instructions to cancel a specific claim were submitted in an amendment paper, listing the claim as canceled in the claim status would constitute an instruction to cancel the claim; no other instruction would be necessary. Any added claims (in the current amendment document) should be merely identified in the status parenthetical expression as "(new)" and should not be underlined.

As proposed in paragraph (c)(4), the claims should be presented in ascending numerical order. This would prevent the grouping of claims by status (all new claims together, all amended claims together, etc.), and ensure a complete set of claims in numerical order, regardless of status. Consecutive claims of the same status, however, could be aggregated (*e.g.*, "Claims 1-5 (previously canceled)"). Further, it is proposed to revise paragraph (c)(4) to require that any sheet of an amendment paper including part of the text of a claim shall not include material directed to any other part of the amendment or any remarks concerning the claims. This requirement will facilitate indexing of the application papers.

Paragraph (c)(5) would require that a claim canceled in its entirety could only be reinstated if presented as a new claim with a new claim number.

Paragraph (d) would require that any drawing changes be submitted in compliance with § 1.84 on replacement sheets in an attachment to an amendment document. An accompanying detailed explanation of all of the changes would be provided on a separate sheet in the drawing amendments or remarks section of the amendment document. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even though only one figure may be amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant would be notified and informed of any required corrective action in the next Office action. No further drawing submission of the amended drawing figure(s) by applicant would be required, unless applicant is so notified.

As proposed in paragraph (d)(1), the applicant would be permitted to provide a marked-up copy of any figure being amended with the amendment document. This mark-up would be used by the Office to determine the changes being made in the drawings.

As proposed in paragraph (d)(2), examiners would be permitted to require a marked-up copy of a figure that has been or is required to be revised. The examiner may make the requirement in an Office action requiring a drawing correction, or after a drawing amendment has been made.

A change is proposed to the last line of paragraph (g) in order to bring it into conformity with earlier changes, "(c)(1)" is changed to "(c) and (c)(1) through (c)(5)".

It is proposed that paragraph (h) be added to require that each section of an amendment (*e.g.*, amendments to the claims, amendments to the specification, replacement drawings, remarks) begin on a separate sheet of the amendment paper.

Paragraphs (h), (i), and (j) have been renamed as (i), (j), and (k), respectively.

Section 1.125: Paragraph (b) is proposed to be revised to add a cross-reference to § 1.312 to remind applicants that for submissions of substitute specifications filed after the notice of allowance has been mailed and up to the time of payment of the issue fee, entry of the substitute specification is not a matter of right.

Paragraphs (c) of § 1.125 is proposed to be revised to require the presentation by applicant of both a marked-up version of the specification (using strike-through to indicate deleted subject matter and underlining to indicate added subject matter) and a clean version without markings.

Section 1.823: Section 1.823 is proposed to be amended by revising paragraph (a)(1) to require that any sheet including a part of a sequence listing not include material other than part of a sequence listing. This change is to facilitate indexing of the specification.

Rule Making Considerations

Administrative Procedure Act: This notice proposes changes to the rules of practice that facilitate electronic image record management of patent application files to support the beginning-to-end electronic processing of patent applications. The changes proposed in this notice are limited to the format for and the manner of making amendments to patent applications, the handling of patent applications and other papers within the Office, the manner of filing information disclosure statements, and the procedures for electronic exchange of priority documents with other intellectual property offices. Therefore, these changes involve rules of agency practice and procedure under 5 U.S.C. 553(b)(A). *See Bachow Communications Inc. v. FCC*, 237 F.3d 683, 690 (D.C. Cir. 2001). Therefore, prior notice and opportunity for public comment are not required pursuant to 5 U.S.C. 553(b) or (c) (or any other law). Nevertheless, the Office is providing this opportunity for public comment on the changes proposed in this notice because the Office desires the benefit of public comment on these proposed changes.

Regulatory Flexibility Act: As prior notice and an opportunity for public comment are not required pursuant to 5 U.S.C. 553 (or any other law), an initial regulatory flexibility analysis under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) is not required. *See* 5 U.S.C. 603.

Executive Order 13132: This rule making does not contain policies with federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 13132 (Aug. 4, 1999).

Executive Order 12866: This rule making has been determined to be not significant for purposes of Executive Order 12866 (Sept. 30, 1993).

Paperwork Reduction Act: This proposed rule involves information collection requirements which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). The collections of information involved in this proposed rule have been reviewed and previously approved by OMB under the following control numbers 0651-0021, 0651-0031, 0651-0032 and 0651-0033. The United States Patent and Trademark Office is not resubmitting an information collection package to OMB for its review and approval because the changes in this proposed rule would not affect the information collection requirements associated with the information collection under OMB control numbers 0651-0021, 0651-0031, 0651-0032 and 0651- 0033.

The title, description and respondent description of each of the information collections is shown below with an estimate of the annual reporting burdens. Included in the estimate is the time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection of information. The principal impacts of the changes in this proposed rule are to (1) expressly provide for the electronic submission of an information disclosure statement; (2) provide for a slight change in the format of an application being filed in order to accommodate for the scanning and indexing of different sections of the application file; and (3) provide for a change in the manner of making amendments to an application consistent with the Office's efforts to establish a patent electronic image management system.

4. Section 1.14 is revised to read as follows:

§ 1.14 Patent applications preserved in confidence.

(a) *Confidentiality of patent application information*. Patent applications that have not been published under 35 U.S.C. 122(b) are generally preserved in confidence pursuant to 35 U.S.C. 122(a). Information concerning the filing, pendency, or subject matter of an application for patent, including status information, and access to the application, will only be given to the public as set forth in § 1.11 or in this section.

(1) Records associated with patent applications other than international applications (see paragraph (h) of this section for international applications) shall be available in the following situations:

(i) *Patented applications and Statutory Invention Registrations*. The file of an application that has issued as a patent or published as a statutory invention registration is available to the public as set forth in § 1.11(a). A copy of the patent application-as-filed, the file contents of the application, or a specific document in the file of such an application shall be provided upon request and payment of the appropriate fee set forth in § 1.19(b).

(ii) *Published abandoned applications*. The file of an abandoned application that has been published as a patent application publication is available to the public as set forth in § 1.11(a). A copy of

the application-as-filed, the file contents of the published application, or a specific document in the file of the published application shall be provided to any person upon request, and payment of the appropriate fee set forth in § 1.19(b).

(iii) *Published pending applications.* A copy of the application-as-filed, the file contents of the published application, or a specific document in the file of a pending application that has been published as a patent application publication shall be provided to any person upon request, and payment of the appropriate fee set forth in § 1.19(b). If a redacted copy of the application was used for the patent application publication, the copy of the specification, drawings, and papers may be limited to a redacted copy. The Office will not provide access to the paper file of a pending application that has been published, except as provided in paragraph (c) or (i) of this section.

(iv) *Unpublished abandoned applications (including provisional applications) that are referenced in certain documents.* The file contents of an abandoned application that is referenced in a U.S. patent, Statutory Invention Registration, a U.S. patent application publication, or an international patent application publication of an international application that was published in accordance with PCT Article 21(2) are available to the public, if a written request is submitted. Also, the file contents of an abandoned application that is relied upon under 35 U.S.C. 119(e), 120, 121, or 365 by an application that has issued as a U.S. patent, or in an application that has published as a Statutory Invention Registration, U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2) are available to the public, if a written request is submitted. A copy of the application-as-filed, the file contents of the application, or a specific document in the file of the application shall be provided to any person upon written request, and payment of the appropriate fee (§ 1.19(b)).

(v) *Unpublished pending applications that are referenced in certain documents.* A copy of the application-as-filed of a pending application that is referenced in a U.S. patent, Statutory Invention Registration, a U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2) shall be provided to any person upon written request, including the fee set forth in § 1.19(b)(1). Also, a copy of the application-as-filed of a pending application that is relied upon under 35 U.S.C. 119(e), 120, 121, or 365 by an application that has issued as a U.S. patent, or in an application that has published as a Statutory Invention Registration, a U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2) shall be provided to any person upon written request, including the fee set forth in § 1.19(b)(1). Until the application is abandoned, patented, or published as a Statutory Invention Registration or a U.S. patent application publication, a granted petition for access (see paragraph (i) of this section), or a power to inspect (see paragraph (c) of this section) is necessary to obtain the file of the application.

(vi) *Applications that were not published or patented, and are not referenced in a U.S. patent, a Statutory Invention Registration, a U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2), or relied upon under 35 U.S.C. 119(e), 120, 121, or 365 in an application that has issued as a U.S. patent, or been published as a Statutory Invention Registration, a U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2).* Applications that were not published or patented, and are not referenced in a U.S. patent, a Statutory Invention Registration, a U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2) are not available to the public, unless the application that issued as the U.S. patent or was published as the Statutory Invention Registration, U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2) claims the benefit of the application under 35 U.S.C. 119(e), 120, 121, or 365. A granted petition for access (see paragraph (i) of this section), or a power to inspect (see paragraph (c) of this section) is necessary to obtain the application, or a copy of the application.

(2) Information concerning a patent application may be communicated to the public if the patent application is identified in paragraphs (a)(1)(i) through (a)(1)(v) of this section. The information that may be communicated to the public (*i.e.*, status information) includes:

(i) Whether the application is pending, abandoned, or patented;

(ii) Whether the application has been published under 35 U.S.C. 122(b);

(iii) The application "numerical identifier" which may be:

(A) The eight-digit application number (the two-digit series code plus the six-digit serial number); or

(B) The six-digit serial number plus any one of the filing date of the national application, the international filing date, or date of entry into the national stage; and

(iv) Whether an application claims the benefit of the application (*i.e.*, whether there are any applications that claim the benefit of the filing date under 35 U.S.C. 119(e), 120, 121 or 365 of the application), and if there are any such applications, the numerical identifier of the application, the specified relationship between the applications (*e.g.*, continuation), whether the application is pending, abandoned or patented, and whether the application has been published under 35 U.S.C. 122(b).

(b) *Electronic access to an application.* Where a copy of the application papers or access to the application is available pursuant to paragraphs (a)(1)(i) through (a)(1)(v) of this section, the Office may at its discretion provide access only to an electronic copy of the specification, drawings, and file contents of the application.

(c) *Power to inspect a pending or abandoned application.* Access to an application shall be provided to any person if the application file is available, and the application contains written authority (*e.g.*, a power to inspect) granting access to such person. The written authority must be signed by:

(1) An applicant;

(2) An attorney or agent of record;

(3) An authorized official of an assignee of record (made of record pursuant to § 3.71 of this chapter); or

(4) A registered attorney or agent named in the papers accompanying the application papers filed under § 1.53 or the national stage documents filed under § 1.495, if an executed oath or declaration pursuant to § 1.63 or § 1.497 has not been filed.

(d) *Applications reported to Department of Energy.* Applications for patents which appear to disclose, purport to disclose or do disclose inventions or discoveries relating to atomic energy are reported to the Department of Energy, which Department will be given access to the applications. Such reporting does not constitute a determination that the subject matter of each application so reported is in fact useful or is an invention or discovery, or that such application in fact discloses subject matter in categories specified by 42 U.S.C. 2181(c) and (d).

(e) *Unpublished applications provided to other Intellectual Property Offices.* Before a patent application is published or otherwise becomes available to the public pursuant to paragraphs (a)(1)(i) through (a)(1)(iv) of this section, the Office may, pursuant to an agreement between the Office and another Intellectual Property (IP) Office, provide the other IP Office with access to the electronic record of the application without charge to applicant, if applicant consents. After an application has been published, such consent is not required.

(f) *Decisions by the Director or the Board of Patent Appeals and Interferences.*

(1) Any action of the Board of Patent Appeals and Interferences, or any decision on petition, may be published or made available for public inspection without applicant's or patent owner's permission if rendered in a file open to the public pursuant to § 1.11 or available pursuant to § 1.14(e)(2), in an application that has been published in accordance with §§ 1.211 through 1.221, or in an application claiming benefit of an earlier filing date under 35 U.S.C. 119(a)-(d), 120, 121 or 365 of an application that has been published or patented.

(2) Any action of the Board of Patent Appeals and Interferences, or any decision on petition not publishable under paragraph (f)(1) of this section, may be published or made available for public inspection if the Director believes the action or decision involves an interpretation of patent laws or regulations that would be of important precedential value; and the applicant, or any party involved in the interference, does not within two months after being notified of the intention to make the action or decision public, object in writing on the ground that the decision discloses a trade secret or other confidential information and states that such information is not otherwise publicly available. If an action or decision discloses such information, the applicant or party shall identify the deletions in the text of the action or decision considered necessary to protect the information. If the applicant or the party considers that the entire action or decision must be withheld from the public to protect such information, the applicant or party must explain why. Applicants or parties will be given time, not less than twenty days, to request reconsideration and seek court review before any portions of actions or decisions are made public over their objection. *See* § 2.27 for trademark applications.

(g) *Publication pursuant to § 1.47.* Information as to the filing of an application will be published in the Official Gazette in accordance with § 1.47(c).

(h) *International applications.* (1) Copies of international application files for international applications which designate the U.S. and which have been published in accordance with PCT Article 21(2), or copies of a document in such application files, will be furnished in accordance with PCT Articles 30 and 38 and PCT Rules 94.2 and 94.3, upon written request including a showing that the publication of the application has occurred and that the U.S. was designated, and upon payment of the appropriate fee (*see* § 1.19(b)), if:

(i) With respect to the Home Copy (the copy of the international application kept by the Office in its capacity as the Receiving Office, see PCT Article 12(1)), the international application was filed with the U.S. Receiving Office;

(ii) With respect to the Search Copy (the copy of the international application kept by the Office in its capacity as the International Preliminary Searching Authority, see PCT Article 12(1)), the U.S. acted as the International Searching Authority; or

(iii) With respect to the Examination Copy (the copy of an international application kept by the Office in its capacity as the International Preliminary Examining Authority), the United States acted as the International Preliminary Examining Authority, an International Preliminary Examination Report has issued, and the United States was elected.

(2) A copy of an English language translation of a publication of an international patent application which has been filed in the United States Patent and Trademark Office pursuant to 35 U.S.C. 154(2)(d)(4) will be furnished upon written request including a showing that the publication of the application in accordance with PCT Article 21(2) has occurred and that the U.S. was designated, and upon payment of the appropriate fee (§ 1.19(b)(4)).

(3) Access to international application files for international applications which designate the U.S. and which have been published in accordance with PCT Article 21(2), or copies of a document in such application files, will be furnished in accordance with PCT Articles 30 and 38 and PCT Rules 94.2 and 94.3, upon written request including a showing that the publication of the application has occurred and that the U.S. was designated.

(4) In accordance with PCT Article 30, copies of an international application-as-filed under paragraph (a) of this section will not be provided prior to the international publication of the application pursuant to PCT Article 21(2).

(5) Access to international application files under paragraphs (a)(1)(i)-(iv) and (h)(3) of this section will not be permitted with respect to the Examination Copy in accordance with PCT Article 38.

(i) *Access or copies in other circumstances.* The Office, either sua sponte or on petition, may also provide access or copies of all or part of an application if necessary to carry out an Act of Congress or if warranted by other special circumstances. Any petition by a member of the public seeking access to, or copies of, all or part of any pending or abandoned application preserved in confidence pursuant to paragraph (a) of this section, or any related papers, must include:

(1) The fee set forth in § 1.17(h); and

(2) A showing that access to the application is necessary to carry out an Act of Congress or that special circumstances exist which warrant petitioner being granted access to all or part of the application.

7. Section 1.52 is amended by revising paragraphs (a) and (b) to read as follows:

§ 1.52 Language, paper, writing, margins, compact disc specifications.

(a) Papers that are to become a part of the permanent United States Patent and Trademark Office records in the file of a patent application or a reexamination proceeding.

(1) All papers, other than drawings, that are submitted on paper or by facsimile transmission, and are to become a part of the permanent United States Patent and Trademark Office records in the file of a patent application or reexamination proceeding, must be on sheets of paper that are the same size, not permanently bound together, and:

(i) Flexible, strong, smooth, non-shiny, durable, and white;

(ii) Either 21.0 cm by 29.7 cm (DIN size A4) or 21.6 cm by 27.9 cm (81/2 by 11 inches), with each sheet including a top margin of at least 2.0 cm (3/4 inch), a left side margin of at least 2.5 cm (1 inch), a right side margin of at least 2.0 cm (3/4 inch), and a bottom margin of at least 2.0 cm (3/4 inch);

(iii) Written on only one side in portrait orientation;

(iv) Plainly and legibly written either by a typewriter or machine printer in permanent dark ink or its equivalent; and

(v) Presented in a form having sufficient clarity and contrast between the paper and the writing thereon to permit the direct reproduction of readily legible copies in any number by use of photographic, electrostatic, photo-offset, and microfilming processes and electronic capture by use of digital imaging and optical character recognition.

(2) All papers that are submitted on paper or by facsimile transmission and are to become a part of the permanent records of the United States Patent and Trademark Office should have no holes in the sheets as submitted.

(3) The provisions of this paragraph and paragraph (b) of this section do not apply to the pre-printed information on paper forms provided by the Office, or to the copy of the patent submitted on paper in double column format as the specification in a reissue application or request for reexamination.

(4) See § 1.58 for chemical and mathematical formulae and tables, and § 1.84 for drawings.

(5) If papers that are submitted on paper or by facsimile transmission do not comply with paragraph (a)(1) of this section and are submitted as part of the permanent record, other than the drawings, applicant, or the patent owner, or the requester in a reexamination proceeding, will be notified and given a period of time within which to provide substitute papers that comply with paragraph (a)(1) of this section in order to avoid abandonment of the application in the case of an applicant for patent, termination of proceedings in the case of a patent owner in a reexamination proceeding, or refusal of consideration of the papers in the case of a third party requester in a reexamination proceeding.

(6) Papers that are submitted electronically to the Office must be formatted and transmitted in compliance with the Office's electronic filing system requirements.

(7) If the papers that are submitted electronically to the Office do not comply with paragraph (a)(6) of this section, the applicant, or the patent owner, or the requester in a reexamination proceeding, will be notified and given a period of time within which to provide substitute papers that comply with paragraph (a)(6) of this section in order to avoid abandonment of the application in the case of an applicant for patent, termination of proceedings in the case of a patent owner in a reexamination proceeding, or refusal of consideration of the papers in the case of a third party requester in a reexamination proceeding.

(b) The application (specification, including the claims, drawings, and oath or declaration) or reexamination proceeding and any amendments or corrections to the application or reexamination proceeding.

(1) The application or proceeding and any amendments or corrections to the application (including any translation submitted pursuant to paragraph (d) of this section) or proceeding, except as provided for in § 1.69 and paragraph (d) of this section, must:

(i) Comply with the requirements of paragraph (a) of this section; and

(ii) Be in the English language or be accompanied by a translation of the application and a translation of any corrections or amendments into the English language together with a statement that the translation is accurate.

(2) The specification (including the abstract and claims) for other than reissue applications and reexamination proceedings, and any amendments for applications (including reissue applications) and reexamination proceedings to the specification, except as provided for in §§ 1.821 through 1.825, must have:

(i) Lines that are 1 1/2 or double spaced;

(ii) Text written in a nonscript type font (*e.g.*, Arial, Times Roman, or Courier) lettering style having capital letters which are at least 0.21 cm (0.08 inch) high; and

(iii) Only a single column of text.

(3) The claim or claims must commence on a separate physical sheet or electronic page (§ 1.75(h)).

(4) The abstract must commence on a separate physical sheet or electronic page or be submitted as the first page of the patent in a reissue application or reexamination proceeding (§ 1.72(b)).

(5) Other than in a reissue application or reexamination proceeding, the pages of the specification including claims and abstract must be numbered consecutively, starting with 1, the numbers being centrally located above or preferably, below, the text.

(6) Other than in a reissue application or reexamination proceeding, the paragraphs of the specification, other than in the claims or abstract, may be numbered at the time the application is filed, and should be individually and consecutively numbered using Arabic numerals, so as to unambiguously identify each paragraph. The number should consist of at least four numerals enclosed in square brackets, including leading zeros (*e.g.*, [0001]). The numbers and enclosing brackets should appear to the right of the left margin as the first item in each paragraph, before the first word of the paragraph, and should be highlighted in bold. A gap, equivalent to approximately four spaces, should follow the number. Nontext elements (*e.g.*, tables, mathematical or chemical formulae, chemical structures, and sequence data) are considered part of the numbered paragraph around or above the elements, and should not be independently numbered. If a nontext element extends to the left margin, it should not be numbered as a separate and independent paragraph. A list is also treated as part of the paragraph around or above the list, and should not be independently numbered. Para-

graph or section headers (titles), whether abutting the left margin or centered on the page, are not considered paragraphs and should not be numbered.

(7) If papers that do not comply with paragraphs (b)(1) through (b)(5) of this section are submitted as part of the application, the applicant, or patent owner, or requester in a reexamination proceeding, the applicant, patent owner or requester in a reexamination proceeding will be notified and given a period of time within which to provide substitute papers that comply with paragraphs (b)(1) through (b)(5) of this section in order to avoid abandonment of the application in the case of an applicant for patent, termination of proceedings in the case of a patent owner in a reexamination proceeding, or refusal of consideration of the papers in the case of a third party requester in a reexamination proceeding.

8. Section 1.59 is revised to read as follows:

§ 1.59 Expungement of information or copy of papers in application file.

(a)(1) Information in an application will not be expunged, except as provided in paragraph (b) of this section.

(2) Information forming part of the original disclosure (*i.e.*, written specification including the claims, drawings, and any preliminary amendment specifically incorporated into an executed oath or declaration under §§ 1.63 and 1.175) will not be expunged from the application file.

(b) An applicant may request that the Office expunge information, other than what is excluded by paragraph (a)(2) of this section, by filing a petition under this paragraph. Any petition to expunge information from an application must include the fee set forth in § 1.17(h) and establish to the satisfaction of the Director that the expungement of the information is appropriate.

(c) Upon request by an applicant and payment of the fee specified in § 1.19(b), the Office will furnish copies of an application, unless the application has been disposed of (see §§ 1.53(e), (f) and (g)). The Office cannot provide or certify copies of an application that has been disposed of.

9. Section 1.71 is amended by adding paragraph (f) to read as follows:

§ 1.71 Detailed description and specification of the invention.

* * * * *

(f) The specification must commence on a separate sheet and each sheet including part of the specification may not include other parts of the application.

10. Section 1.72 is amended by revising paragraph (b) to read as follows:

§ 1.72 Title and abstract.

* * * * *

(b) A brief abstract of the technical disclosure in the specification must commence on a separate sheet, preferably following the claims, under the heading "Abstract" or "Abstract of the Disclosure." The sheet or sheets presenting the abstract may not include other parts of the application. The abstract in an application filed under 35 U.S.C. 111 may not exceed 150 words in length. The purpose of the abstract is to enable the United States Patent and Trademark Office and the public generally to determine quickly from a cursory inspection the nature and gist of the technical disclosure.

* * * * *

11. Section 1.75 is amended by revising paragraph (h) to read as follows:

§ 1.75 Claim(s).

* * * * *

(h) The claim or claims must commence on a separate sheet and any sheet including a claim or portion of a claim may not contain any other parts of the application.

* * * * *

12. Section 1.97 is amended by revising paragraphs (b)(3), (b)(4) and (c) to read as follows:

§ 1.97 Filing of information disclosure statement.

* * * * *

(b) * * *

(3) Before the day of the mailing of a first Office action on the merits; or

(4) Before the day of the mailing of a first Office action after the filing of a request for continued examination under § 1.114.

(c) An information disclosure statement shall be considered by the Office if filed after the period specified in paragraph (b) of this section, provided that the information disclosure statement is filed before the day of the mailing date of any of a final action under § 1.113, a notice of allowance under § 1.311, or an action that otherwise closes prosecution in the application, and it is accompanied by either:

(1) The statement specified in paragraph (e) of this section; or

(2) The fee set forth in § 1.17(p).

* * * * *

13. Section 1.98 is amended by adding paragraph (e) to read as follows:

§ 1.98 Content of information disclosure statement.

* * * * *

(e) The requirement in paragraph (a)(2)(i) of this section for a copy of all listed U.S. patents and U.S. patent application publications does not apply to any information disclosure statement submitted in compliance with the Office's electronic filing system.

14. Section 1.99 is amended by revising paragraphs (d) and (e) to read as follows:

§ 1.99 Third-party submission in published application.

* * * * *

(d) A submission under this section shall not include any explanation of the patents or publications, or any other information. The Office will not enter such explanation or information if included in a submission under this section. A submission under this section is also limited to ten total patents or publications.

(e) A submission under this section must be filed within two months from the date of publication of the application (§ 1.215(a)) or prior to the mailing of a notice of allowance (§ 1.311), whichever is earlier. Any submission under this section not filed within this period is permitted only when the patents or publications could not have been submitted to the Office earlier, and must also be accompanied by the processing fee set forth in § 1.17(i). A submission by a member of the public to a pending published application that does not comply with the requirements of this section will not be entered.

* * * * *

15. Section 1.121 is revised to read as follows:

§ 1.121 Manner of making amendments in applications.

(a) *Amendments in applications, other than reissue applications.* Amendments in applications, other than reissue applications, are made by filing a paper, in compliance with § 1.52, directing that specified amendments be made.

(b) *Specification.* Amendments to the specification other than the claims and computer listings (§ 1.96) and sequence listings (§ 1.825) must be made by replacement paragraph, replacement section or substitute specification in the manner specified in this section.

(1) *Amendment by instruction to delete, replace, or add a paragraph. Amendments to the specification may be made by submitting*:

(i) An instruction, which unambiguously identifies the location, to delete one or more paragraphs of the specification, replace a deleted paragraph with one or more replacement paragraphs, or add one or more paragraphs; and

(ii) Any replacement or added paragraph(s) marked-up to show all the changes relative to the previous version of the paragraph(s). The changes must be shown by strike-through (for deleted matter) or underlining (for added matter).

(2) *Amendment by replacement section.* If the sections of the specification contain section headings as provided in § 1.77(b), § 1.154(b), or § 1.163(c), amendments to the specification, other than the claims, may be made by submitting:

(i) A reference to the section heading along with an instruction to delete that section of the specification and to replace such deleted section with a replacement section; and

(ii) A replacement section marked-up to show all changes relative to the previous version of the section. The changes must be shown by strike-through (for deleted matter) or underlining (for added matter).

(3) *Amendment by substitute specification.* The specification, other than the claims, may also be amended by submitting:

(i) An instruction to replace the specification; and

(ii) A substitute specification in compliance with § 1.125(c).

(4) *Reinstatement*: Deleted matter may be reinstated only by a subsequent amendment presenting the previously deleted matter.

(5) Presentation: Instructions for entry of replacement paragraphs or sections must be provided with an unambiguous and precise location. Deletion of a paragraph or section is permitted by instruction only; no text to be canceled should be presented. Once a paragraph, section, or specification is amended in a first amendment document, the paragraph, section or specification shall not be re-presented in successive amendment documents unless it is amended again or a substitute specification is provided.

(c) *Claims.* Amendments to a claim must be made by rewriting the entire claim with all changes (*e.g.*, additions, deletions, modifications) as indicated in this section. Each amendment document that includes a change to an existing claim, or submission of a new claim, must include a complete listing of all claims in the application. The listing will serve to replace all prior versions of the text of the claims (except for withdrawn claims) in the application. The text of all pending claims (except for withdrawn claims) must be submitted in a single amendment document each time any claim is amended. The status of each of the claims in the application, including any previously canceled or withdrawn claims, must be indicated in each amendment document. Status is indicated by a parenthetical expression following the claim number and should be indicated by use of one of the following identifiers: (Original), (Currently amended), (Previously amended), (Canceled), (Withdrawn), (Previously added), (New), (Reinstated—formerly claim #_), (Previously reinstated), (Re-presented—formerly dependent claim #_), or (Previously re-presented). Only claims of status "currently amended" shall include markings.

(1) Currently amended claims: All claims being currently amended in an amendment paper shall be submitted with markings to indicate the changes that have been made relative to the immediate prior version of the claims. The changes in any amended claim shall be shown by strike-through (for deleted matter) or underlining (for added matter). Only claims of status "currently amended" shall include markings.

(2) Original, previously amended, or previously added claims: The text of pending claims not being currently amended shall be presented in each amendment document in clean version, *i.e.*, without any markings in the presentation of clean text. The presentation of clean text in any claim will constitute an assertion that it has not been changed relative to the immediate prior version. The text of canceled and withdrawn claims shall not be presented, but must be indicated by only claim number and status.

(3) Cancelled and new (added) claims: A claim is canceled by providing an instruction to cancel the claim by claim number. No markup shall be presented. Listing a claim as canceled will constitute an instruction to cancel the claim. Any claims added by amendment must be indicated as (new), and shall not be underlined.

(4) When one or more claims are amended or added in an amendment document, all of the claims shall be presented in a listing in ascending numerical order. Consecutive canceled or withdrawn claims may be aggregated into one statement (*e.g.*, Claims 1-5 (canceled)). The text of the claims shall commence on a separate sheet of the amendment document and the sheet(s) that contain the text of any part of the claims shall not contain any other part of the amendment.

(5) A claim canceled by amendment (deleted in its entirety) may be reinstated only by a subsequent amendment presenting the claim as a new claim with a new claim number.

(d) *Drawings.* Application drawings are amended in the following manner: Any changes to the application drawings must be in compliance with § 1.84 and must be submitted as replacement sheets as an attachment to the amendment document. Any replacement sheets shall include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is amended. Applicant shall explain in detail the changes made beginning on a separate sheet in the drawing amendments or remarks section of the amendment paper.

(1) The applicant may include a marked-up copy of one or more of the figures being amended indicating the changes being made.

(2) The applicant shall include a marked-up copy of any figure that has been amended indicating the changes being made when required by the examiner.

(e) *Disclosure consistency.* The disclosure must be amended, when required by the Office, to correct inaccuracies of description and definition, and to secure substantial correspondence between the claims, the remainder of the specification, and the drawings.

(f) *No new matter.* No amendment may introduce new matter into the disclosure of an application.

(g) *Exception for examiner's amendments.* Changes to the specification, including the claims, of an application made by the Office in an examiner's amendment may be made by specific instructions to insert or delete subject matter set forth in the examiner's amendment by identifying the precise point in the specification or the claim(s) where the insertion or deletion is to be made. Compliance with paragraphs (b)(1), (b)(2), (c) or (c)(1) to (c)(5) is not required.

(h) *Amendment sections.* Each section of an amendment document must begin on a separate sheet.

(i) *Amendments in reissue applications.* Any amendment to the description and claims in reissue applications must be made in accordance with § 1.173.

(j) *Amendments in reexamination proceedings.* Any proposed amendment to the description and claims in patents involved in reexamination proceedings must be made in accordance with § 1.530.

(k) *Amendments in provisional applications.* Amendments in provisional applications are not normally made. If an amendment is made to a provisional application, however, it must comply with the provisions of this section. Any amendments to a provisional application shall be placed in the provisional application file but may not be entered.

16. Section 1.125 is proposed to be amended by revising paragraphs (b) and (c) to read as follows:

§ 1.125 Substitute specification.

* * * * *

(b) Subject to § 1.312, a substitute specification, excluding the claims, may be filed at any point up to payment of the issue fee if it is accompanied by a statement that the substitute specification includes no new matter.

(c) A substitute specification submitted under this section must be submitted with markings showing all the changes (underlining to indicate subject matter being added and strike-through indicating subject matter being deleted) relative to the immediate prior version of the specification of record. An accompanying clean version (without markings) must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown pursuant to this paragraph.

* * * * *

17. Section 1.823 is proposed to be amended by revising paragraph (a)(1) to read as follows:

§ 1.823 Requirements for nucleotide and/or amino acid sequences as part of the application.

(a)(1) If the "Sequence Listing" required by § 1.821(c) is submitted on paper: The "Sequence Listing," setting forth the nucleotide and/or amino acid sequence and associated information in accordance with paragraph (b) of this section, must begin on a new page and must be titled "Sequence Listing." The pages of the "Sequence Listing" preferably should be numbered independently of the numbering of the remainder of the application. Each page of the "Sequence Listing" shall contain no more than 66 lines and each line shall contain no more than 72 characters. The sheet or sheets presenting a sequence listing may not include other parts of the application. A fixed-width font should be used exclusively throughout the "Sequence Listing."

Third Party Attempts to Protest or Otherwise Oppose the Grant of a Published Application

The American Inventors Protection Act of 1999 (AIPA) contained a number of changes to title 35 of the United States Code. *See* Pub. L. 106-113, 113 Stat. 1501, 1501A-552 through 1501A-591 (1999). These changes included provisions for the publication, with certain exceptions, of pending patent applications (other than design applications) eighteen months after the earliest claimed filing date ("eighteen-month publication"). *See* 35 U.S.C. § 122(b). The United States Patent and Trademark Office (USPTO) amended the rules of practice in title 37 of the Code of Federal Regulations to implement the eighteen-month publication provisions of the AIPA by a final rule published in September of 2000. *See Changes to Implement Eighteen-Month Publication of Patent Applications*, 65 FR 57023 (Sept. 20, 2000), 1239 *Off. Gaz. Pat. Office* 63 (Oct. 10, 2000) (final rule).

The eighteen-month publication provisions of the AIPA also provide that the USPTO "**shall** establish appropriate procedures to ensure that no protest or other form of pre-issuance opposition to the grant of a patent on an application may be initiated after publication of the application without the express written consent of the applicant." *See* 35 U.S.C. § 122(c) (emphasis added). Third parties may submit patents or publications for consideration in a pending published application, with no further comment or explanation, pursuant to 37 CFR 1.99. Despite the provisions of 35 U.S.C. § 122(c), the USPTO occasionally receives third-party inquiries or submissions (other than under 37 CFR 1.99) regarding applications that have been published under the eighteen-month publication provisions of 35 U.S.C. § 122(b). For example, third parties have inquired into the timing of future actions on an application, and some third parties have insisted that the USPTO withdraw an application from issue under 37 CFR 1.313 on the basis of unpatentability of a claim. The USPTO considers any third-party inquiry or submission that is not provided for in 37 CFR 1.99 in a published application in which the applicant has **not** provided an express written consent to protest or pre-issuance opposition to be inappropriate.

The USPTO interprets the provisions of 35 U.S.C. § 122(c) as requiring, rather than simply empowering, the USPTO to ensure that no protest or other form of pre-issuance opposition to an application may be initiated after its publication without the express written consent of the applicant. *See* 145 Cong. Rec. S14,708, S12,719 (daily ed. Nov. 17, 1999) (35 U.S.C. 122(c) "**requires** the Director to establish procedures to ensure that no protest or other form of pre-issuance opposition to the grant of a patent on an application may be initiated after publication of the application without the express written consent of the applicant" (emphasis added)).[1]

[1]While the Conference Report resulting in Pub. L. 106-113 does not contain any discussion (other than the incorporated language) of the AIPA, a section-by-section analysis of the AIPA (among other provisions of Pub. L. 106-113) was printed in the Congressional Record at the request of Senator Lott.

Following enactment of 35 U.S.C. § 122(c), the USPTO revised 37 CFR 1.291 and 1.292 to prohibit third parties from submitting any protest or initiating any public use proceedings (the only forms of third party protest or pre-issuance opposition to a pending application permitted by the rules of practice) after publication of an application. To balance the mandate of 35 U.S.C. § 122(c) that the USPTO establish "appropriate procedures" to ensure that third parties may not initiate protest or other pre-issuance opposition to an application after its publication (without the express written consent of the applicant) and the USPTO's authority and responsibility under 35 U.S.C. §§ 131 and 151 to issue a patent only if "it appears that the applicant is entitled to a patent under the law," the USPTO promulgated 37 CFR 1.99 to permit third parties to submit patents and publications (*i.e.*, prior art documents that are public information and which the USPTO would discover on its own with an ideal prior art search) during a limited period after publication of an application. However, 37 CFR 1.99 prohibits third parties from submitting any explanation of the patents or publications, or submitting any other information. *See Changes to Implement Eighteen-Month Publication of Patent Applications*, 65 FR at 57032-33, 57042-44, 1239 *Off. Gaz. Pat. Office* 71, 79-81.

Pursuant to the mandate of 35 U.S.C. § 122(c) that the USPTO establish "appropriate procedures" to ensure that third parties may not initiate protest or other pre-issuance opposition to an application after its publication (without the express written consent of the applicant), the USPTO is instructing the Patent Examining Corps to: (1) not reply to any third-party inquiry or other submission in a published application that is still pending before the USPTO; (2) not act upon any third-party inquiry or other submission in a

published application, except for written submissions that are provided for in 37 CFR 1.99 and written submissions in applications in which the applicant has provided an express written consent to protest or pre-issuance opposition; and (3) decline to accept oral or telephoned comments or submissions about published applications from third parties. When refusing third-party telephone or oral discussions, examiners may call the party's attention to the statutory prohibition on initiating protests, to this Notice, or to 37 CFR 1.2 (all Office business should be transacted in writing), if appropriate. The USPTO may also refer third-party inquiries or submissions not provided for in 37 CFR 1.99 by registered practitioners in published applications in which the applicant has **not** provided an express written consent to protest or pre-issuance opposition to the Office of Enrollment and Discipline for appropriate action.

Finally, the provisions of 35 U.S.C. § 122(c) and 37 CFR 1.99, 1.291, and 1.292 limit a third party's ability to protest, oppose the grant of, or have information entered and considered in an application pending before the USPTO. However, these provisions (and this notice) do not limit the USPTO's authority to independently re-open the prosecution of a pending application on the USPTO's own initiative and consider information deemed relevant to the patentability of any claim in the application. *See Blacklight v. Dickinson*, 295 F.3d 1269, 63 USPQ2d 1534 (Fed. Cir. 2002).

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information for the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis optical disk series are available at all PTDLs to increase access to that information. It is through the optical disk systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge.

However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI^3) at the Sunnyvale Public Library in Sunnyvale, California.

SECTION 1.— INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.— INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
